Notsi ya pulani ya Xinghezi xo sungula: 1 growing area has a stretch with no new sowing: PRIVATE {note}, east; $& (all year). A staple plot grows one crop across the whole block. Once its course for the year is used, no second staple may follow it. No declared winter cover reaches these months. A vegetable crop could cover them, but the planner will not put a vegetable on a traced field on its own — planted at full block width that is a sizeable commitment, so it is left as your decision. Sowing one by hand, or resting the ground, are both sound choices.
