Avocado: 24 kg yo kaɲwaho; 18 kg yo rengiswaho; 6 kg yo vhulungwaho; R360 yo ʱanganedzwaho.

Lemon: 18 kg yo kaɲwaho; 12 kg yo rengiswaho; 6 kg yo vhulungwaho; R120 yo ʱanganedzwaho.

Macadamia: 10 kg yo kaɲwaho; 8 kg yo rengiswaho; 2 kg yo vhulungwaho; R240 yo ʱanganedzwaho.

Mango: 30 kg yo kaɲwaho; 24 kg yo rengiswaho; 6 kg yo vhulungwaho; R360 yo ʱanganedzwaho.

Marula: 12 kg yo kaɲwaho; 6 kg yo rengiswaho; 6 kg yo vhulungwaho; R60 yo ʱanganedzwaho.

Vhulani Rekhodo u vhona khaɲo, u rengisa na invoyisi zwo ʱumanywaho. Mbalo dza ngade ya mitshelo dzi nga katelwa kana dza bviswa kha girafu dza khaɲo; tshelede ya ngade ya mitshelo a i kovhekanywi nga vhuhulwane ha mibete ya miroho.

07 BOQ na u lugela ndambedzo

Mutheo wa mbalo dzi ḓivheaho: 1 800 m² ya vhupo ha miroho na 1 200 m² ya vhupo ha zwimela zwa zwiḽiwa zwa ndeme. Zwavhelo izwi a si ʱhaluso dza u fhaʱa.

Manweledzo aya a a na mbalo dza u fhaʱa dzo kaliwaho kana khotheisheni dza vhaɲetshedzi. Ṱhoḓea dzi si na mitengo a si ʱhoḓea dzi si na mbadelo; vhuḓivhofhi ha ndambedzo vhu ʱoḓa u khwaʱhisedzwa.

Sengulusani phakheji dzo fhelelaho hune zwa ʱoḓea: u vhulunga maḓi na mutheo na ʱhumanyo dzaho; u ʱavha na u ʱhogomela musi hu tshi thomiwa; zwishumiswa zwa maanḓa a ḓuvha na u zwi thoma u shuma. Khwaʱhisedzani mbalo na zwi ḓisendekaho nga zwiṅwe phanḓa ha u vhea mitengo.

Vhulungani mushumo wo tendelwaho wa thandela ya zwino wo fhambana na ʱhoḓea dzo engedzeaho dzi re nnḓa ha mugaganyagwama. Maitele o dzinginywaho a Ndambedzo na u ɲetshedza a ḓo ʱumanya ʱhoḓea idzo na BOQ dzi re na mbadelo na zwavhelo zwa vhalambedzi; maitele eneo o fhelelaho ha athu wanala.

08 Vhuʱanzi ha u ɲetshedza na maga a tevhelaho

U tevhelela hu rangiswaho: vhulungani mutevhe wa mushumo ni sedzuluse vhuʱanzi phanḓa ha u kovha mveledziso i tevhelaho ya mbekanyamushumo.

Sedzulusani mutevhe na ʱhoḓea dza thikhedzo na tshigwada; vhambedzani rekhodo dzi re na maḓuvha phanḓa ha u vhiga tshanduko kha mvelelo.

Rekhodani mathannga o dzheniswaho na vhuhulwane ha u vhulunga zwo fhambanywa na maḓi o kuvhanganywaho o kaliwaho. Rekhodani vhuhulwane ha maanḓa a ḓuvha o thomaho u shuma ho fhambanywa na maanḓa o bveledzwaho. Rekhodani miri yo ʱavhiwaho yo fhambanywa na u tshila na khaɲo ya mitshelo.

Shumisani zwifanyiso zwi re na maḓuvha, rasithi, rekhodo dza nyendo na tsenguluso dzo teaho dza u shuma. Invoyisi yo badelwaho kana tshifanyiso tsho itwaho nga AI a zwi khwaʱhisedzi uri u

dzhenisa ho fhela.

09 Mutheo wa muvhigo

Nyimele ya tshifhinga tshenetsho: g1 / 2026-09-06. Tshiko: khathaḽogo ya ngade yo lugiswaho na ṱhaluso ya tsenguluso ya lushaka lwayo.

Zwo lugiswa nga rekhodo dza lwendo; a hu na ṱhoḓisiso ya fhethu ya phurofeshinala kana tsenguluso ya zwino yo itwaho.

Tshifanyiso tsho itwa nga AI nahone mveledziso ndi wa tsumbo, a u tevhedzi tshikalo. Zwifanyiso zwa zwifhaṱuwo zwa vhahulwane kha zwiṅwe zwipiḓa zwa lwendo zwi nga dovhololwa.

Shumisani fhethu ha mushumo ha Ubhejane ho fhambanaho kha pulane ya bulasi yo ṱumanywaho i koneaho u lugiswa. U vula muvhigo uyu wa ngade a zwi ṅwali nṱha ha mapa kana muvhigo wa vhukuma.

Maṅwalwa a u thoma a English

Executive summary

A shared growing site with communal production and a meeting space.

Siyazama Community Garden is the Soweto, GP example. Its register contains 28 adult participants, 1 240 kg of logged produce and 92% training progress.

Status: Thriving. Coordinator: Nomsa M..

Prepared 2026-09-06. Tour edition · Prepared records and schematic layouts.

Site and production area

Garden type: Community garden. Group language: isiZulu.

Site boundary area: 6 000 m².

Vegetable beds: 1 800 m². Staple plots: 1 200 m². Total planted area: 3 000 m².

The remaining site area includes schematic buildings, access, tree areas and other space. It is not automatically available for planting. Areas come from the tour register, not measurements inferred from the photograph.

The map point refers to the Soweto, GP area; it is not a surveyed property or a navigation instruction.

Layout and site assessment

The schematic separates the store, meeting area, vegetable blocks, staple area, trees and water point.

Planning considerations: shared responsibilities, water access and fair record keeping are the main operational issues. Group membership must not be inferred from photographs.

Soil planning: bed condition and soil management should be considered with water and access. No measured laboratory result is supplied for this example, so no pH, nutrient concentration or amendment rate is asserted.

The reference photograph illustrates this garden type. Its visible details are not a verified inventory and cannot establish dimensions, ownership, water availability or soil properties.

Water, infrastructure and planting needs

The schematic marks a water point. Its source, storage capacity, reliability and installation status have not been measured in this tour.

Vegetable and staple allocations are recorded separately. Tree symbols indicate planning context; species, number planted, survival and maturity need their own evidence.

Agree the work roster, access arrangements and produce distribution records. Assign an owner to

each follow-up action.

Any water storage or solar proposal needs an appropriate specification, installation plan, costs and maintenance responsibility before it becomes a funded deliverable.

Production, participation and learning

Harvest logged: 1 240 kg. This is the same total shown in this garden profile. It is not a yield forecast or independently verified result.

28 adult participants are in this example register. The displayed 92% training figure is progress, not proof of improved livelihoods.

The catalogue does not provide a common crop-by-crop reporting period for every garden. Do not calculate annual yield, profitability or household savings from these totals.

A live report should distinguish produce kept, donated, sold and lost, and use dated attendance and assessments for learning outcomes.

Orchard bookkeeping example

Worked records for exploring fruit and nut capture; these are separate from the garden profile total above and do not establish planted species or seasonal yields.

Avocado: 24 kg picked; 18 kg sold; 6 kg retained; R360 received.

Lemon: 18 kg picked; 12 kg sold; 6 kg retained; R120 received.

Macadamia: 10 kg picked; 8 kg sold; 2 kg retained; R240 received.

Mango: 30 kg picked; 24 kg sold; 6 kg retained; R360 received.

Marula: 12 kg picked; 6 kg sold; 6 kg retained; R60 received.

Open Records to view the connected harvests, sales and invoices. Orchard quantities can be included or excluded from harvest graphs; orchard income is not divided by vegetable-bed area.

BOQ and funding readiness

Known quantity basis: 1 800 m^2 of vegetable area and 1 200 m^2 of staple area. These allocations are not construction specifications.

This overview has no measured construction quantities or supplier quotations. Unpriced needs are not zero-cost needs; funding commitments require confirmation.

Assess complete packages where needed: water storage with its base and connections; planting with establishment care; solar equipment with commissioning. Verify quantities and dependencies before pricing.

Keep approved current-project work separate from additional needs outside the budget. The proposed Funding & delivery workflow will connect those needs to costed BOQs and funder allocations; that full workflow is not yet available.

Delivery evidence and next actions

Priority follow-up: maintain the work roster and review evidence before sharing the next programme update.

Review the roster and support needs with the group; compare dated records before reporting changes in results.

Record installed tanks and storage capacity separately from measured water collected. Record commissioned solar capacity separately from energy produced. Record planted trees separately from survival and fruit harvest.

Use dated photos, receipts, visit records and appropriate operational checks. A paid invoice or an AI-generated image does not verify a completed installation.

Report basis

Snapshot: g1 / 2026-09-06. Source: the prepared garden catalogue and its type-specific assessment narrative.

Prepared from tour records; no professional site survey or live analysis was performed.

The photograph is AI-generated and the layout is schematic, not to scale. Adult portraits elsewhere in the tour may repeat.

Use the separate Ubhejane workspace for the connected editable farm design. Opening this garden report does not overwrite any real map or report.
