

Plan the whole activity

All amounts, hours and dates are invented. This is a new January-March 2027 practice plan, not a recommended growing season. No crop, land area or yield is supplied.

Budget input	Activity A	Activity B
Expected sales	R600.00	R500.00
Direct inputs	R220.00	R180.00
Planned hire use	2 hours	4 hours
Equal-size crate spaces	2	1
Unpaid family work	4 hours	6 hours

Share one hire bill of **R120.00** by its hours. Share one trip bill of **R90.00** by crate spaces. For this exercise only, compare family time at **R25.00/hour**. No wages are paid.

Your budget	A	B	Combined
Hire share	R _____	R _____	R _____
Trip share	R _____	R _____	R _____
Total specified cash inputs	R _____	R _____	R _____
Unpaid-time comparison	R _____	R _____	R _____
Sales less these included costs	R _____	R _____	R _____

Why is the last line not full farm profit? Name a missing cost and one capacity check needed before both activities can run.

Follow each payment date

Opening 1 January: cash tin **R120.00** and bank **R180.00**, both assumed available. Start with their combined amount. The cards are forecasts, not payments already made.

Source / date	Expected movement	In / out	Projection
P01 / 05 Jan	Activity A inputs	-R220.00	R _____
P02 / 10 Jan	Activity B inputs	-R180.00	R _____
P03 / 20 Jan	Shared equipment hire	-R120.00	R _____
R01 / 25 Jan	Activity A buyer pays	+R600.00	R _____
P04 / 05 Feb	Shared market trip	-R90.00	R _____
R02 / 20 Feb	Activity B buyer pays	+R500.00	R _____
P05 / 25 Feb	Owner takes money for household	-R150.00	R _____
P06 / 10 Mar	Equipment purchase	-R250.00	R _____
R03 / 20 Mar	Buyer settles an opening amount owed	+R120.00	R _____
P07 / 25 Mar	Pay an opening supplier bill	-R80.00	R _____

First shortage date: _____. **Lowest projection:** R _____.

Deepest gap: R _____. **31 March projection:** R _____.

A negative number is an unfunded gap, not available cash or an approved overdraft. Continuing the calculation does not prove those payments can be made. What must change before the first shortage?

Carry forward, then change

Use the dated cards. Opening + receipts - payments = closing. Carry each closing balance to the next opening. Never add the three closing balances as money available.

Month	Opening	Receipts	Payments	Closing
January	R _____	R _____	R _____	R _____
February	R _____	R _____	R _____	R _____
March	R _____	R _____	R _____	R _____

Keep these separate from combined cash receipts:

X01 / R50.00: Bank to cash tin; both included; no fee in this exercise.

X02 / R500.00: Funding applied for; no approval or payment date.

X03 / R600.00: Activity A invoice issued; not a second receipt.

X04 / R500.00: Activity B invoice issued; not a second receipt.

Compare each change with BASE. Use the original cards each time; do not add scenario balances together.

Change	31 March	Deepest gap
A pays on 28 February	R _____	R _____
B sales and receipt fall to R350	R _____	R _____
B inputs rise to R240	R _____	R _____
Late A payment and higher B inputs	R _____	R _____
B pays on 20 April	R _____	R _____
Equipment purchase agreed for 10 April	R _____	R _____
B input quote not yet known	R _____	R _____

Which change keeps the ending balance but makes the earlier gap worse? Why does a later equipment purchase not solve a January shortage?

Make a decision with evidence

1 / Fresh allocation. Share a R60.00 bill by recorded use of one unit and two units. Check that the two shares still equal the original bill.

2 / Fresh dates. Start with R90.00. Pay R130.00 on Day 2; receive R80.00 on Day 10; pay R20.00 on Day 20. Find the closing amount, lowest projection and first shortage. Does a positive ending prove every earlier bill can be paid?

3 / Missing evidence. An additional payment fee will apply, but its amount is missing. Can the forecast still be described as complete? What source would resolve it?

4 / A reasoned response. A buyer pays late. Name an option to investigate, the date it must work by, what needs agreement and what other amounts would change. An application for funding is not available cash.

5 / Your field task. Prepare a redacted short forecast. Label the opening money, dates, source references, unknowns and one adverse case. Keep the original plan for comparison with later evidence. Do not put forecast sales into actual My Records.

Companions: imbewufield.vercel.app/student/guides/expenses and [/student/guides/invoices](http://imbewufield.vercel.app/student/guides/invoices). Keep hypothetical records in this workbook. This practice is not a certification of farm viability.
