INPUTS

Seed and seedling buying schedule

Find the month, then the crop and bed. Check the seed quantity and sowing method before buying.

The buying rule

Source direct-sown or tray seed before the named sowing month; the source does not provide a universal procurement lead time. Ready-grown seedlings are listed at the start of the field-readiness window; buy them only when the bed and seedlings are ready. Living corms, slips, cloves and seed potatoes are listed close to planting. For a tray crop, choose either packet seed for the nursery or ready-grown seedlings - not both.

A published field seed rate gives a weight range for the mapped area. Confirm the sowing method with the supplier; no germination or loss allowance is added. For crops without a published seed rate, field spacing supports only an approximate FINAL stand. It does not prove a seed-buying quantity: use the packet's crop-specific sowing rate and germination guidance. Living-material ranges are approximate field positions from mapped area and published spacing, not guaranteed order quantities or loss allowances; supplier and crop-specific guidance may change what to purchase.

Source/check	Crop	Quantity	Method	For	Planting timeline
December 2026	Butternut	Packet rate needed	Direct sow; ~10 final positions	Bed 3	Sow Dec
March 2027	Broccoli	~11–21 seedlings positions	Ready seedlings; own seed before Feb nursery	Bed 6	Source own seed before Feb; nursery Feb; check/transplant Mar-May
April 2027	Carrots	Packet rate needed	Direct sow; ~316–1 585 final positions	Beds 2, 4	Sow Apr
October 2027	Green beans	Packet rate needed	Direct sow; ~98–230 final positions	Bed 5	Sow Oct
	Lettuce	~21–37 seedlings positions	Ready seedlings; own seed before Sep nursery	Bed 2	Source own seed before Sep; nursery Sep; check/transplant Oct-Dec

PLAN VERSUS REALITY

Monthly harvest and field record

Write the month: _____ Team: _____

Write down what actually happened

Record the date, crop, bed and actual harvest weight. Write how much was used, kept, shared or lost. These records help you check the next plan.

Harvest record

Date	Crop / bed	Picked kg	Used kg	Stored kg	Sold/shared kg	Lost kg

PLAN VERSUS REALITY

Fruit, eggs, honey and other production

Write the month: _____ Team: _____

Use the unit you actually measured

Write the food and its source: tree, coop, hive or bed. Use kg for weighed food, eggs for counted eggs, or jars, bunches or items. Record jar size in the source column. Keep all amounts on one row in the same unit.

Date	Food / source	Collected	Unit	Used	Sold/shared	Lost

Weekly observation

Week	Rainfall	Irrigation	Pests / disease	What we observed	What we changed

Decision for next month

Observe. Adjust. Write it down.
